

# DP21-SAL QUICK OPERATION GUIDE

- Recording -

AX8231-01

## Recording Procedure

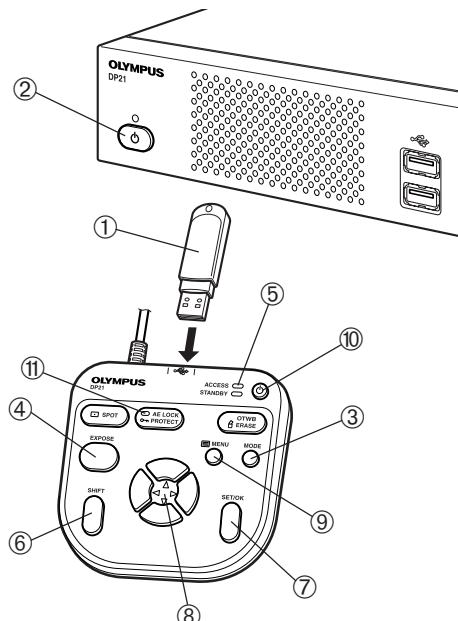

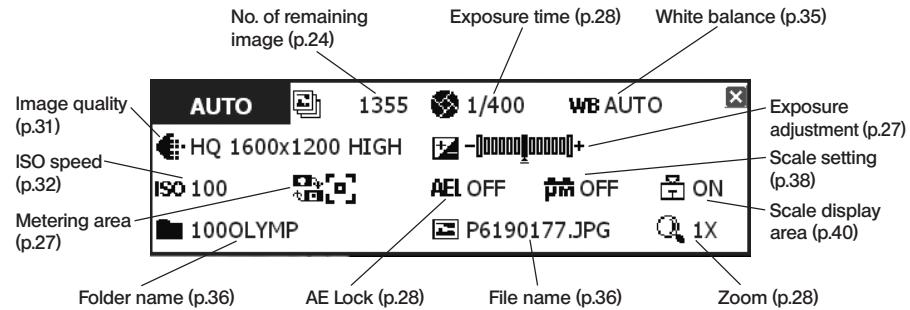

## Main factory setups

- INFO display : ON (displayed)
- Recording mode : HQ (DP21)  
2448x1920, JPEG-LOW (DP26)
- Exposure correction : ±0
- White balance : AUTO
- Metering mode : 30% average
- Sharpness : NORMAL
- ISO : 100
- Image color setting : COLOR1

◎ For details on the settings, refer to the instruction manual.

## INFO display

(The page numbers below are those in the instruction manual.)  
The screen shown below is the INFO display when combined with DP21.

## Tips

- Press the cursor buttons **▲▼** ⑧ to zoom into the image. Before zooming, be sure to hide the MENU display (use the MENU button ⑨ for view/hide switching).
- To scroll a zoomed image, press the cursor buttons ⑧ while holding the SHIFT button ⑥ or SET/OK button ⑦ depressed.
- Press the Shift + MENU buttons to hide the INFO display.
- If no image is displayed, first press the main switch ② and then press the MENU button ⑨ while the AE lock LED ⑪ lights (for about 1 second) during startup. The system will start up with the SVGA resolution (800x600).

## CAUTION

- Do not connect a device other than the USB memory provided with the DP21-SAL to the USB port of the hand switch (if a USB device with high power consumption is connected, it may not function due to insufficient current supply).
- Always leave the main switch of the camera head to ON.
- After the system is turned OFF using the main switch ② of the control box, it cannot be turned ON using the standby switch of the hand switch. The main switch ② of the control box should be used in such a case (when the system is turned OFF using the standby switch ⑩ of the hand switch, the system can be turned ON with either switch).

**Playback Procedure**

Insert a USB memory ① containing recorded images.

Press the main switch ② to ON.

**PLAY mode setting**  
Press the MODE button ③ to switch the modes in the order of REC AUTO → PLAY → REC MANUAL

1-image playback

- Press the SET/OK button ④ (to switch the index display to 1-image display).
- Press either cursor button  $\blacktriangleleft\triangleright$  ⑤ to select an image.

Played image zooming

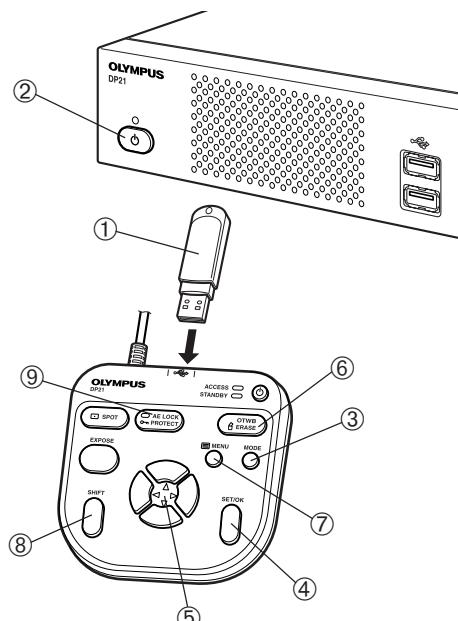

Press either cursor button  $\blacktriangle\blacktriangledown$  ⑤ to select one of "Index display" to "4x."

1-image erasure

- 1-image display: Use cursor button ⑤  $\blacktriangleleft\triangleright$ .
- Index display: Place cursor on the desired image using cursor buttons ⑤  $\blacktriangle\blacktriangledown\blacktriangleleft\triangleright$ .

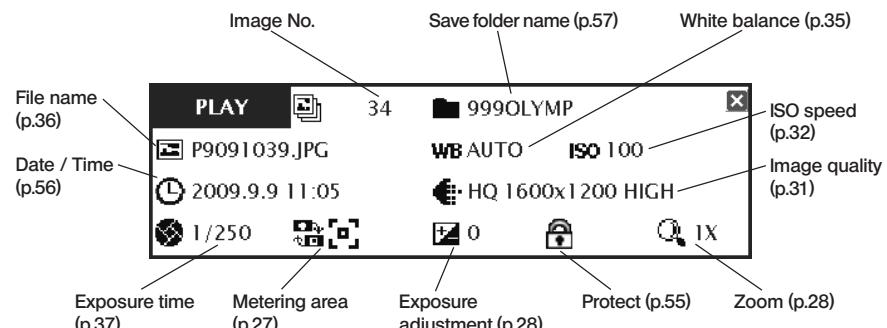

Press the ERASE button ⑥.

When the confirmation message is displayed, press the SET/OK button ④ to enter selection.

**INFO display**

(The page numbers below are those in the instruction manual.)

The screen shown below is the INFO display when combined with DP21.

**Tips**

- Hide the MENU display before zooming an image (the display can be viewed or hidden using the MENU button ⑦).
- To increase the zoom ratio, press cursor button ⑤  $\blacktriangle$ .  
(Each press of  $\blacktriangle$  switches it in order of 1x → 1:1 (equal size) → 2x → 4x.)
- To decrease the zoom ratio, press cursor button ⑤  $\blacktriangledown$ .  
(Each press of  $\blacktriangledown$  switches it in order of 4x → 2x → 1:1 (equal size) → 1x → Index display)
- To scroll an image during 2x or 4x zooming, press cursor buttons ⑤ while holding the SHIFT button ⑧ or SET/OK button ④.
- To switch index display to 1-image playback display, select the desired image and press the SET/OK button ④.
- To turn the INFO display off, Press the Shift + MENU buttons.
- To protect image data (erasure prohibition), select the desired image and press the PROTECT button ⑨.

**CAUTION**

- The protected images cannot be erased. (They should be unprotected before attempting erasure.)
- When FORMAT is selected, all of the files in the USB memory, including the protected images as well as document files, will be erased.
