Configuración del BIOS/sistema operativo del PC

Configuración del BIOS

Cómo iniciar el BIOS:

Encienda el PC controlador y pulse la tecla [F10] mientras el logotipo de HP se muestra en pantalla.

En función del tiempo que tarde en reconocerse el monitor, es posible que no se llegue a visualizar el logotipo de HP.

Si el sistema operativo se inicia por no pulsar a tiempo la tecla [F10], reinicie el PC controlador e inténtelo de nuevo.

*1) Elemento que se cambia manualmente (el elemento debe cambiarse desde el BIOS de forma predeterminada)

Después de confirmar que los todos los elementos anteriores están definidos, guarde la configuración del BIOS.

Cómo guardar la configuración del BIOS:
1. Haga clic en [Main] - [Save Changes and Exit] y seleccione [Yes] en la pantalla [Save Change?].
2. Si aparece la pantalla [Secure Boot], introduzca el número mostrado y pulse la tecla [Enter].

Configuración del sistema operativo

Antes de configurar el sistema operativo, debe activar Windows conectando el PC controlador a la red.
1. Conecte el PC controlador a la red.
2. Haga clic en [Start]-[Settings]-[Update & Security]-[Activation]-[Troubleshoot].
3. Cuando aparezca [Troubleshoot has completed], haga clic en [Activate Windows].
4. Asegúrese de que se muestre el mensaje [Windows is Activated with a Digital license] y cierre todas las pantallas de configuración.
5. Desconecte el PC controlador de la red.
